

Pinball Games for Sale

9/5/14

All games located on the West Coast
(Former collection of Gene Cunningham)

These games are being sold as-is and where-is. They are available for viewing by special arrangement. There are less than 135 games remaining from the original 450, and the games are now being sold individually. Almost all of the games are EMs, some are pitch-n-bats, etc.

The games are no longer set up. Most of the games are in excellent cosmetic shape and appear to be in good condition but they have not been played in a long while (10-30 years). We believe most of these games haven't been powered on for 10 years or more. There are a few games where the condition is less than ideal. The bottom line is that we cannot guarantee that any particular game is complete, or that it works. We are also not in a position to plug them in to try them. You are welcome to view the games.

We have determined what we feel is a reasonable price for each game, based on historical ebay sales or the Mr Pinball price guide where ebay sales data isn't available.

You can view pictures of most of the games here: <http://www.pinball.com/sale/games/index.html>

The game number listed refers to the number on the backglass in the pictures. Numbers over 302 are on the filename, not on the backglass. All games are subject to prior sale. Games with a ~~line thru~~ are sold.

For more information, contact Matt Christiano, matt@planetarypinball.com

The games:

Game #	Game	mfg	year	price
305	Speed Bowler	BLY		799
